**16. While uploading data in Offline tool - FORM GSTR-1, there is discrepancy in the number of invoices and other details, which are filled in excel and that on the offline tool. What could be the reason?**

This arises because of validation checks performed by the offline tool after data from excel sheet is imported into it. The invoices and other data that fail checks/validations are rejected by the offline tool. - Incorrect data entered after decimal. Only two digits need to be entered after decimal.

**18. I see differences in summary displayed in the Offline tool and that on the GST portal, after upload of JSON file. What could be the reasons?**

Differences in summary displayed in the Offline tool and that on the GST portal, after upload of JSON file, could be because of following reasons:

- Correctness of GSTIN of Buyers (whether GSTIN is active or not) is checked. If GSTIN is not active, then invoices will be rejected on uploading of JSON on the portal.
- Duplicate invoice number is checked, with respect to data uploaded earlier on the portal by the taxpayer. As the data uploaded later, in certain circumstances will over-write the earlier data, as available on the Portal.
- Discrepancy may also arise if the summary in the tiles on FORM GSTR-1 are not updated. One has to click “Generate FORM GSTR-1 Summary” button at the bottom left part of FORM GSTR-1 page, to update the summary.

In case of supply of services (by a registered taxpayer) by way of transportation or courier of goods to a place outside India, the place of supply is the foreign country outside India (being destination of such goods).

For reporting such transactions, where POS lies in foreign country, the supplier of services (the registered taxpayer) needs to select State code as '96-Foreign Country' from the list of codes.

The registered recipient of services will then be entitled to ITC, though POS lies outside the State of his registration, in case State code 96 is mentioned by of the supplier of services (the registered taxpayer) in their statement of outward supplies.

Illustration – Supplier of goods 'A' is registered in State 'X' in India who has got an order for supply from a foreign country 'F'. Supplier 'A' asked another taxpayer 'B' registered in the same State 'X' to supply services (couriers etc.) for transportation of goods to the foreign country. Taxpayer 'B' will issue invoice in the name of 'A' and mention POS as state code 96. Though, both the taxpayers are located in the same State but by virtue of POS as 96, the supply will be taxable under IGST and ITC will be available to taxpayer 'A' under IGST head.

Next step is to upload the invoice data. There are four options to upload the data.

- [Option 1: Manual Entry of Invoice Data](#)
- [Option 2: Import full Excel Workbook consisting of multiple sheets](#)
- [Option 3: Copy and Paste from Excel Workbook](#)
- [Option 4: Import the CSV file](#)

Option 2, 3 uses an Excel template that is explained in the later section of this document & option 4 uses CSV template.

## Option 1: Manual Entry of Invoice Data

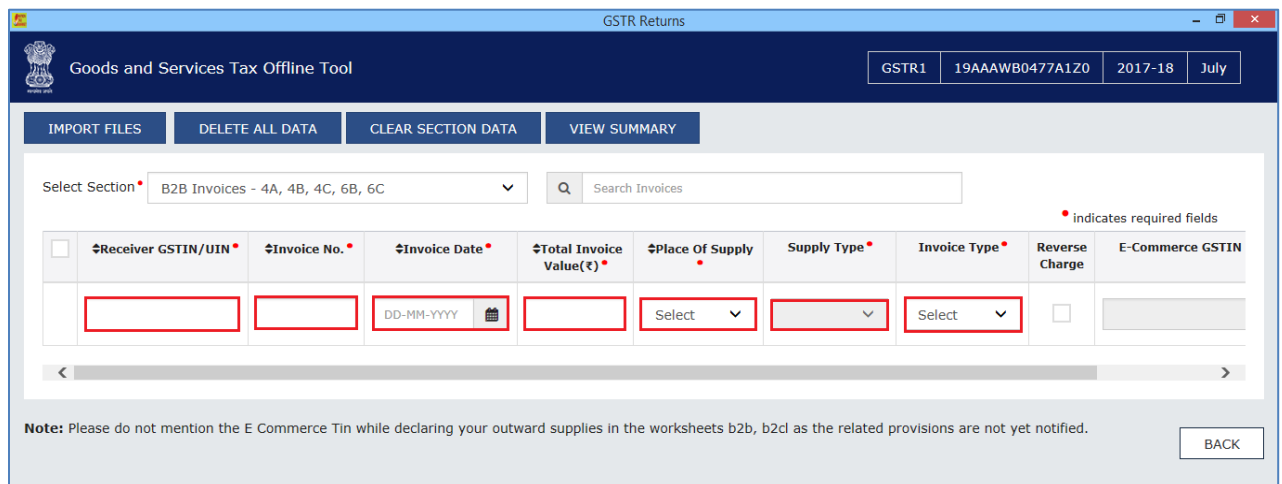

To enter the invoice data manually in the Returns Offline tool directly, perform the following steps. Here, you can enter details of only one invoice at a time.

1. From the **Select Section** drop-down list, select the applicable section where the invoice data needs to be entered.
2. Enter the invoice details in each column like Receiver GSTIN/UIN, Invoice No. etc.
3. Click the **Plus** icon (Highlighted in Red square under **Actions** column) on the right side in order to fill the item level details for this invoice.

Enter the GSTIN in the correct format or else system will display an error message at the time of entry itself.

In case an invoice is uploaded twice in the same tax period in the Returns Offline tool, then the Tool will overwrite the earlier details, however if the same invoice is existing in the earlier tax period filed return in the GST system then the Returns Offline tool may not be able to identify the duplication and error message will be populated only when the invoice data is uploaded to the GST Portal where duplicate entry check is done & error file will be created for the same, user can open it using tool as discussed earlier.

✔ Your JSON file is uploaded successfully. The GST Systems will validate the data uploaded by you for the following: 'GSTIN of buyers'; 'Duplicate invoice'; 'reference of credit/debit notes'; 'tax amount calculated'; 'Date of transaction'. It may take upto 15 minutes..

Invoice Upload

There will a gap of few minutes between the time you upload the invoice data on the Portal and it appears under the relevant section on the Returns dashboard. After upload, a transaction ID is generated, against which you can track your upload processing status. This happens as the GST System will perform the following processing functions before adding the invoice in respective section and enabling you to see the data populated in the relevant tables of FORM GSTR-1:

- Correctness of GSTIN of receivers (Valid GSTINs etc.)
- Duplicate entries of Invoice number for all returns filed by you in past months of the Financial Year in which you are filing the data
- Other sanity checks on the data uploaded by you

24. Go to the B2B invoices in the FORM GSTR-1 tile. Notice the B2B invoices are uploaded.

## 11. Troubleshooting Common Errors Encountered

Offline tool validates the uploaded data while saving and displays errors if any based on the validations implemented in the Returns Offline tool. Some of the validations and error messages are explained and shown in the screenshots below.

1. Please ensure you are entering the date in correct format. Expected formats are **dd-mm-yyyy**. If you are facing errors in selecting dates in given format, then you can refer the below word document to change the format of date.
2. Invoice value should be greater than INR 2,50,000 in case of B2CL (interstate supply to Unregistered person). In case invoice value is less than INR 2, 50,000, then an error is displayed. In such cases, enter the amount more than INR 2, 50,000 in case of B2CL.

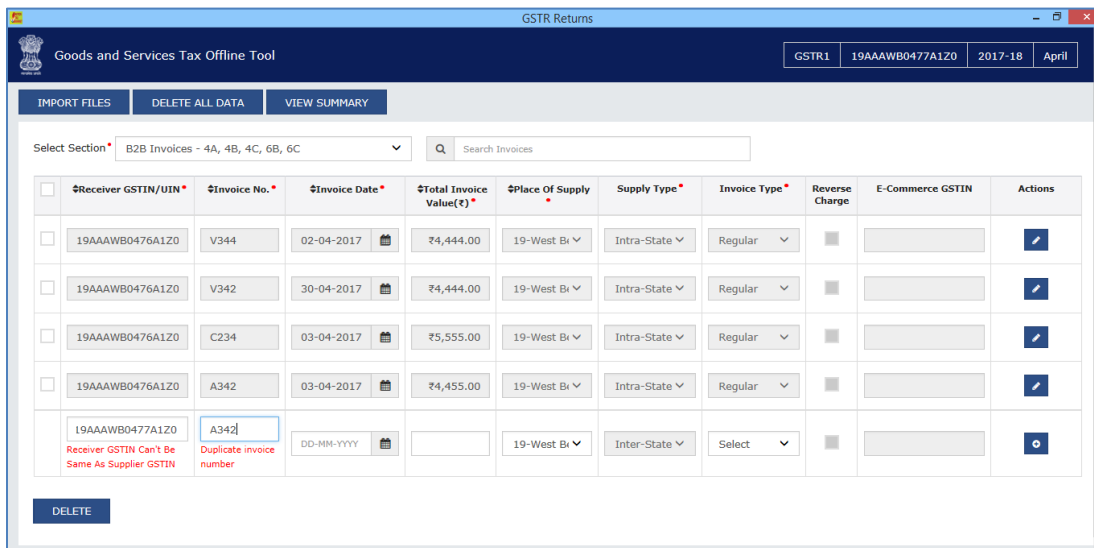

The screenshot shows the 'Goods and Services Tax Offline Tool' interface. The 'Select Section' dropdown is set to 'B2C(Large) Invoices - 5A, 5B'. A table displays invoice details for invoice number 2344, dated 03-04-2017, with a total invoice value of ₹2,334.00. A red error message is displayed: 'Invoice value should be greater than ₹2,50,000/-'. The 'Place Of Supply' is '35-Andaman and Nicobar It' and the 'Supply Type' is 'Inter-State'. A 'BACK' button is visible at the bottom right.

3. Wrong input of GSTIN or Duplicate Invoice Number.

Returns Offline tool may not be able to validate the GSTIN whether the same is active or inactive on the day of data entry but an error is displayed in case the same is not in the standard format.

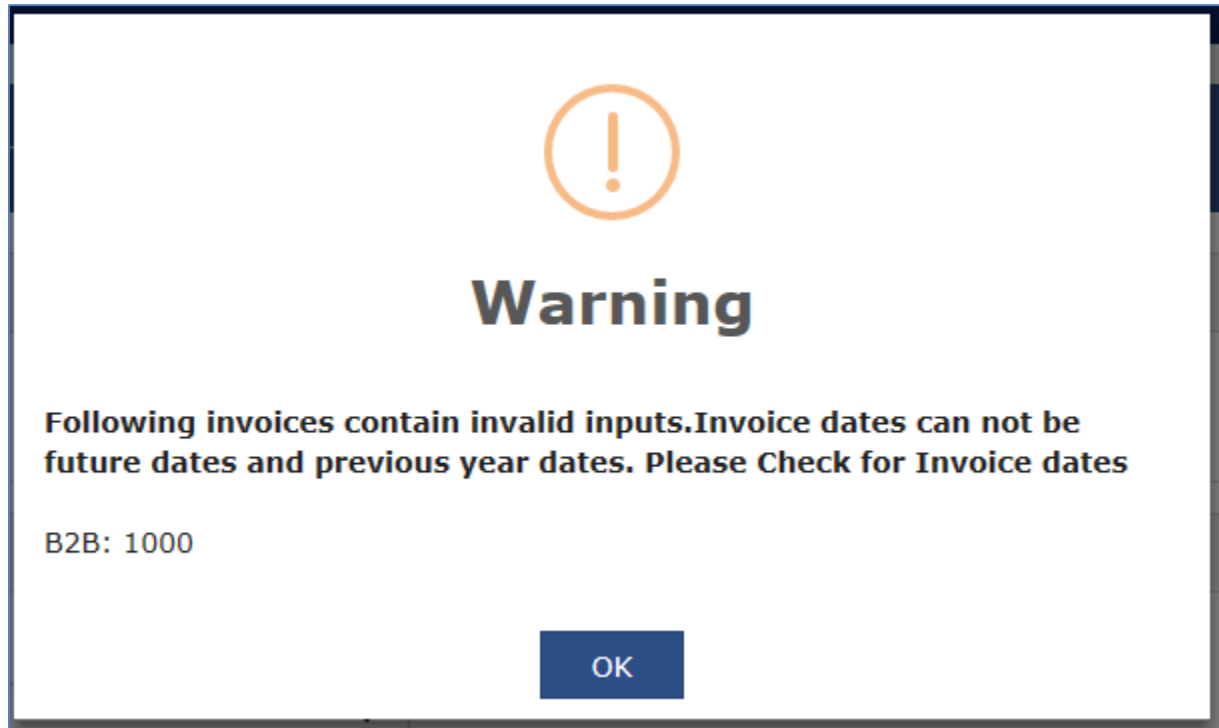

Similarly, if an invoice is uploaded twice in the same tax period in the Tool, then the earlier details get overwritten. However, if the same invoice is existing in the earlier tax period then the Tool may not be able to identify the duplication and error message will be populated only when the return is uploaded to the GST Portal.

The screenshot shows the 'Goods and Services Tax Offline Tool' interface. The 'Select Section' dropdown is set to 'B2B Invoices - 4A, 4B, 4C, 6B, 6C'. A table displays multiple invoice entries. The last entry shows a duplicate invoice number 'A342' for the same supplier GSTIN '19AAAWB0477A1Z0'. A red error message is displayed: 'Receiver GSTIN Can't Be Same As Supplier GSTIN Duplicate invoice number'. A 'DELETE' button is visible at the bottom left.

4. If anything is entered other than numeric value in the HSN/SAC of Supply field, then the Tool displays an error.
5. If excel or csv files contain future dates or if the format of the data is not correct, then the Tool displays an error.

6. Some other general mistakes done by Users in filling the details resulting in errors are:
  - a. Date of invoice is after the date of Tax Period
  - b. Receiver GSTIN is same as of Supplier. This may arise if the taxpayers enters the details of self-invoices of purchases/inward supplies from unregistered persons. These need to be reported in FORM GSTR-1.
  - c. No Invoice exists against corresponding Credit/debit note in case of Supplies to Registered Taxpayers or Interstate Large Customers
  - d. Selection of wrong section while importing csv or copy excel feature.
  - e. While entering multi rate in b2b, b2cl, cdnr, cdnur, exp sections using excel or csv, other than rate, taxable value and cess all entry should be repeated in consecutive row.
  - f. For invoice type SEZ supplier with/without payment and Deemed Exp, E-Com GSTIN is not allowed.
