Clone Catalogue Functionality

Clone Catalogue Functionality

This functionality has been introduced to enable you to quickly create variant of existing catalogs where all specifications except a few have the same values.

You can specify the catalog of which you need to make a variant, make changes in the required specifications and publish.

1. GENERAL INFORMATION

Please enter the catalogue ID of the product you want to copy specifications from. The product should be from the same category. You can find the catalogue ID from the product page in the field having label 'Product ID'

Fill in the catalogue ID of an existing catalogue from the same category in the field

Note : After cloning the specifications, you need to ensure that changes are made to at least one specification, or the system will not allow you to publish a duplicate catalog.
If you need to sell an existing product, you should use the catalog Pair functionality instead.
