**NB**: This export certificate is not a substitute for Export Licence in respect of the items mentioned as restricted under ITC(HS) and an Export licence, in addition to this Certificate, will have to be obtained wherever required for such items.

## Appendix 2P(ii)(a) UNILATERAL "CRIME CONTROLLED" ITEMS ON THE U.S. DEPARTMENT OF COMMERCE CONTROL LIST

<u>S. No.</u>	CC ECCNs	<u>Description</u>
1.	0A978	Law enforcement striking weapons, including saps, police batons, side handle batons, tonfas, sjamboks, and whips
2.	0A979	Police Helmets, Shields
3.	0A981	Equipment designed for the execution of human beings
4.	0A982	Restraint Devices
5.	0E982	Technology for Restraint Devices and discharge type arms
6.	0A983	Specially Designed Implements of Torture
7.	0A984	Shotguns
8.	0E984	Technology for Shotguns
9.	0A985	Discharge Type Arms
10.	0A987	Optical Sighting Devices
11.	1A984	Chemical Agents, Tear Gas
12.	1A985	Fingerprinting Powders, Dyes, Inks
13.	3A980	Voice Print Identification equipment
14.	3A981	Polygraphs, Fingerprints Analyzers
15.	3D980	Software for Voice Print ID
16.	3E980	Technology for Voice Print ID
17.	4A003	Digital Computers for computerised finger-print equipment
18.	4A980	Computers for Fingerprint equipment
19.	4D001	Software for Digital Computers controlled by 4A003
20.	4E001	Technology for Digital Computers controlled by 4A003
21.	4D980	Software for 4A980 Fingerprint Computers
22.	4E980	Technology for Computer for Fingerprint
23.	6A002.c.	Police-Model Infrared Viewers
24.	6E001	Technology for Police Viewer development

25.	6E002	Technology for Police View Production
26.	9A980	Mobile Crime Labs

# Appendix 2P(ii)(b) UNILATERAL "REGIONAL SECURITY" CONTROLLED ITEMS ON THE U.S. DEPARTMENT OF COMMERCE CONTROL LIST

<u>S. No.</u>	RS2 ECCNs	<u>Description</u>		
1.	0A606.b.	Ground vehicles, parts and components, as follows:		
		Unarmed vehicles that are derived from civilian vehicles and that have all of the following:		
		a.	a. Manufactured of fitted with materials or components other than reactive or electromagnetic armour to provide ballistic protection to level III (National Institute of Justice Standard 0108.01, September 1985) or better;	
		b.	b. A transmission to provide drive to both front and rear wheels simultaneously, including those vehicles having additional wheels for load bearing purposes whether driven or not;	
		C.	c. Gross vehicles weight rating (GVWR) greater than 4,500 kg; and	
		d.	Designed or modified for off-road use.	
		2. Pa	Parts and components having all of the following:	
		a.	Specially designed for vehicles specified in paragraph b.1 of this entry; and	
		b.	Providing ballistic protection to level III (National Institute of Justice Standard 0108.01, September 1985) or better	
2.	0A918	Bayonets		
3.	0E918	"Technology" for the "development", "production" or "use" of bayonets.		
4.	1A004	Protective and detection equipment and components, not specially designed for military use, as follows (see List of Items Controlled).		
	•		Gas masks, filter canisters and decontamination equipment therefore designed or modified for defence against any of the following, and specially designed components therefor:	
		a.1. E	Biological agents 'adapted for use in war';	

		a.2. Radioactive materials 'adapted for use in war';	
		a.3. Chemical warfare (CW) agents; or	
		a.4. 'Riot control agents',	
		b. Protective suits, gloves and shoes, specially designed or modified defense against any of the following:	for
		b.1. Biological agents 'adapted for use in war';	
		b.2. Radioactive materials 'adapted for use in war'; or	
		b.3. Chemical warfare (CW) agents;	
		c. Nuclear, biological and chemical (NBC) detection systems, special designed or modified for detection or identification of any of the following and specially designed components therefor:	•
		c.1. Biological agents 'adapted for use in war';	
		c.2. Radioactive materials 'adapted for use in war'; or	
		c.3. Chemical warfare (CW) agents;	
		d. Electronic equipment designed for automatically detecting or identifying the presence of "explosives" residues and utilizing 'trace detection techniques (e.g. Surface acoustic wave, ion mobility spectrometry).	on'
5.	1D003	"Software" specially designed or modified to enable equipment to perform t functions of equipment controlled under 1A004.c. and 1A004.d.	the
6.	1E001	"Technology" according to the General Technology Note for the "development" "production" of items controlled by 1A004.d.	or
7.	2A983	Explosives or detonator detection equipment, both bulk and trace base consisting of an automated device, or combination of devices for automated decision making to detect the presence of different types of explosives, explosives, or detonators; and parts and components, n.e.s.	ted
8.	2A984	Concealed object detection equipment operating in the frequency range from 30 GHz to 3000 GHz and having a spatial resolution of 0.5 milliradian up to and including 1 milliradian at a standoff distance of 100 meters; and parts and components, not elsewhere specified.	
9.	2B018	Equipment as follows:	
	•	Specialized machinery, equipment, gear and specially designed parts a accessories therefor, including but not limited to the following, that are special designed for the examination, manufacture, testing and checking of arm appliances, machines and implements of war:	ally

more in length, with a wall thickness of 2 inches (5 cm) and over;  e. Gun barrel riffling and broaching machines, and tools therefor;  f. Gun barrel riffling machines;  g. Gun barrel trepanning machines;  h. Gun boring and turning machines;  i. Gun honing machines of 6 feet (183 cm) stroke or more;  j. Gun jump screw lathes;  k. Gun riffling machines;  l. Gun straightening presses;  m. Induction hardening machines for tank turret rings and sprockets;  n. Jigs and fixtures and other metal-working implements or accessorie the kinds exclusively designed for use in the manufacture of firear ordnance and other stores and appliances for land, sea or aerial warfa  o. Small arms chambering machines;  p. Small arms deep hole drilling machines and drills therefor;  q. Small arms spill boring machines;  s. Tank turret bearing grinding machines.  10. 2D983 Software specially designed or modified for the development, production, or of equipment controlled by 2A983.  11. 2D984 Software required for the development, production, or use of concealed of detection equipment controlled by 2A983, or the development, production use of equipment controlled by 2A983, or the development of software control by 2D983.  12. 2E983 Technology required for the development, production, or use of equipment controlled by 2A983, or the development of software control by 2D983.			a.	Armor plate drilling machines, other than radial drilling machines;	
d. Centrifugal casting machines capable of casting tubes 6 feet (183 cm more in length, with a wall thickness of 2 inches (5 cm) and over;  e. Gun barrel rifling and broaching machines, and tools therefor;  f. Gun barrel rifling machines;  g. Gun barrel trepanning machines;  h. Gun boring and turning machines;  i. Gun honing machines of 6 feet (183 cm) stroke or more;  j. Gun jump screw lathes;  k. Gun rifling machines;  l. Gun straightening presses;  m. Induction hardening machines for tank turret rings and sprockets;  n. Jigs and fixtures and other metal-working implements or accessorie the kinds exclusively designed for use in the manufacture of firear ordnance and other stores and appliances for land, sea or aerial warfa o. Small arms chambering machines;  p. Small arms chambering machines;  r. Small arms spill boring machines;  r. Small arms spill boring machines.  10. 2D983 Software specially designed or modified for the development, production, or of equipment controlled by 2A983.  11. 2D984 Software required for the development, production, or use of equipment controlled by 2A984.  Technology specially designed or modified for the development, production use of equipment controlled by 2A983, or the development of software control by 2D983.  Technology required for the development, production, or use of equipment controlled by 2A983, or the development of software control by 2D984.  Technology required for the development, production, or use of equipment controlled by 2A983, or the development of software control by 2D984.			b.	Armor plate planing machines;	
more in length, with a wall thickness of 2 inches (5 cm) and over;  e. Gun barrel rifling and broaching machines, and tools therefor;  f. Gun barrel rifling machines;  g. Gun barrel trepanning machines;  h. Gun boring and turning machines;  i. Gun honing machines of 6 feet (183 cm) stroke or more;  j. Gun jump screw lathes;  k. Gun rifling machines;  l. Gun straightening presses;  m. Induction hardening machines for tank turret rings and sprockets;  n. Jigs and fixtures and other metal-working implements or accessorie the kinds exclusively designed for use in the manufacture of fireal ordnance and other stores and appliances for land, sea or aerial warfate.  o. Small arms chambering machines;  p. Small arms deep hole drilling machines and drills therefor;  q. Small arms rifling machines;  r. Small arms spill boring machines.  10. 2D983 Software specially designed or modified for the development, production, or of equipment controlled by 2A983.  11. 2D984 Software required for the development, production, or use of concealed of detection equipment controlled by 2A984.  12. 2E983 Technology specially designed or modified for the development, production use of equipment controlled by 2A983, or the development of software control by 2D983.  13. 2E984 Technology required for the development, production, or use of equipment controlled by 2A984 or required for the development of software controlled by 2A984 or required for the development of software controlled by 2A984 or required for the development of software controlled by 2A984 or required for the development of software controlled by 2A984 or required for the development of software controlled by 2A984 or required for the development of software controlled by 2A984 or required for the development of software controlled by 2A984 or required for the development of software controlled by 2A984 or required for the development of software controlled by 2A984 or required for the development of software controlled by 2A984 or required for the development of software co			C.	Armor plate quenching presses;	
e. Gun barrel rifling and broaching machines, and tools therefor;  f. Gun barrel rifling machines;  g. Gun barrel trepanning machines;  h. Gun boring and turning machines;  i. Gun honing machines of 6 feet (183 cm) stroke or more;  j. Gun jump screw lathes;  k. Gun rifling machines;  l. Gun straightening presses;  m. Induction hardening machines for tank turret rings and sprockets;  n. Jigs and fixtures and other metal-working implements or accessorie the kinds exclusively designed for use in the manufacture of fireal ordnance and other stores and appliances for land, sea or aerial warfs  o. Small arms chambering machines;  p. Small arms rifling machines;  r. Small arms spill boring machines;  s. Tank turret bearing grinding machines.  10. 2D983 Software specially designed or modified for the development, production, or of equipment controlled by 2A983.  11. 2D984 Software required for the development, production, or use of concealed of detection equipment controlled by 2A984.  12. 2E983 Technology specially designed or modified for the development, production use of equipment controlled by 2A983, or the development of software control by 2D983.  13. 2E984 Technology required for the development, production, or use of equipment controlled by 2A984 or required for the development of software controlled by 2D983.			d.	Centrifugal casting machines capable of casting tubes 6 feet (183 cm) or	
f. Gun barrel rifling machines; g. Gun barrel trepanning machines; h. Gun boring and turning machines; i. Gun honing machines of 6 feet (183 cm) stroke or more; j. Gun jump screw lathes; k. Gun rifling machines; l. Gun straightening presses; m. Induction hardening machines for tank turret rings and sprockets; n. Jigs and fixtures and other metal-working implements or accessorie the kinds exclusively designed for use in the manufacture of firear ordnance and other stores and appliances for land, sea or aerial warfa o. Small arms chambering machines; p. Small arms deep hole drilling machines and drills therefor; q. Small arms rifling machines; r. Small arms spill boring machines; s. Tank turret bearing grinding machines.  10. 2D983 Software specially designed or modified for the development, production, or of equipment controlled by 2A983.  11. 2D984 Software required for the development, production, or use of concealed of detection equipment controlled by 2A984.  12. 2E983 Technology specially designed or modified for the development, production use of equipment controlled by 2A983, or the development of software control by 2D983.  13. 2E984 Technology required for the development, production, or use of equipment controlled by 2A984 or required for the development of software controlled				more in length, with a wall thickness of 2 inches (5 cm) and over;

10. 2D983 Software specially designed or modified for the development, production, or of equipment controlled by 2A983.  11. 2D984 Software required for the development, production, or use of concealed obtained detection equipment controlled by 2A984.  12. 2E983 Technology specially designed or modified for the development, production use of equipment controlled by 2A983, or the development of software control by 2D983.  13. 2E984 Technology required for the development, production, or use of equipment controlled by 2A984 or required for the development of software controlled.			r.	Small arms spill boring machines;	
of equipment controlled by 2A983.  11. 2D984 Software required for the development, production, or use of concealed of detection equipment controlled by 2A984.  12. 2E983 Technology specially designed or modified for the development, production use of equipment controlled by 2A983, or the development of software control by 2D983.  13. 2E984 Technology required for the development, production, or use of equipment controlled by 2A984 or required for the development of software controlled.			S.	Tank turret bearing grinding machines.	
detection equipment controlled by 2A984.  12.	10.	2D983		Software specially designed or modified for the development, production, or use of equipment controlled by 2A983.	
use of equipment controlled by 2A983, or the development of software control by 2D983.  Technology required for the development, production, or use of equipment controlled by 2A984 or required for the development of software controlled.	11.	2D984	Software required for the development, production, or use of concealed object detection equipment controlled by 2A984.		
controlled by 2A984 or required for the development of software controlled	12.	2E983	Technology specially designed or modified for the development, production, or use of equipment controlled by 2A983, or the development of software controlled by 2D983.		
	13.	2E984	Technology required for the development, production, or use of equipment controlled by 2A984 or required for the development of software controlled by 2D984.		

14.	6A003.b.4.b	Uncooled thermal imaging cameras		
15.	6A998.c.	Millimetre wave enhanced vision radar imaging systems specially designed rotary wing aircraft and having all of the following:		
		1.	Operates at a frequency of 94 GHz;	
		2.	An average output power of less than 20 mW;	
		3.	Radar beam width of 1 degree; and	
		4.	Operating range equal to or greater than 1500 m	
16.	6A999.c.	Seismic intrusion detection systems that detect, classify and determine the bearing on the source of a detected signal.		
17.	6D991	Software not elsewhere specified specially designed for the development, production, or use of commodities controlled by 6A998.c.		
18.	6D993.b.	Software specially designed for seismic intrusion detection systems controlled by 6A999.c.		
19.	9A515.e.	Microelectronic circuits (e.g. integrated circuits and micro-circuits) that are rated, certified, or otherwise specified or described as meeting or exceeding all the following characteristics and that are specially designed for defence articles controlled by Unites States Munitions List.
